network audit and assessment capacity management

DEFINE YOUR NEEDS

Do you:

- Waste time and money dealing with inaccurate records?
- Need a system for ensuring the accuracy of network records?
- Have difficulty understanding your true network capacity because of unreliable records?
- Experience long service recovery times due to inaccurate customer records?
- Require accurate site access documentation?
- Need a network audit but cannot justify a permanent employee to carry it out?

APPLY NTG CLARITY'S SOLUTIONS

Our team of consultants provides a full range of services, including:

- Physical Network Audits: Telecom equipment, network switches and routers (port count, fibre connections) and support equipment (UPS, local spares).
- Fibre Audits: Fibre counts, fibre routing, fibre splicing and inter-connection documentation.
- Logical Network Audits: Port configurations and virtual circuits.
- Records reconciliation and verification.
- Site access documentation.
- Network database population.
- Capacity management.
- Network audit template libraries.
- Network site packages.

REALIZE THE BENEFITS

- Experienced consultants with in-depth telecom knowledge and comprehensive network audit experience.
- National presence that considerably reduces costs for nationwide audits.
- Thorough understanding of the relationship between capacity management and audit requirements.
- Immediate Productivity: Experienced consultants require minimal training.
- Ability to provide skilled personnel on short notice.
